Improved bed knife holder

Higher lifetime for underwater strand pelletizers USG 600 and USG 900

Your benefits
- Higher productivity due to improved pellet quality
- Optimized adjustability
- Less angled or long pellets

Automatik Plastics Machinery has developed an improved bed knife holder for higher productivity in a reliable process of your underwater strand pelletizing system USG 600 and USG 900.
Improved bed knife holder
Higher lifetime for underwater strand pelletizers USG 600 and USG 900

Due to a reinforced cross section of the knife holder, the wear resistance of the knife holder and stripper has been considerably improved.

Advantages
- Adjustment without gaps helps to reduce angel hair.
- Improved pellet quality as angled and long pellets are reduced.
- Higher cutting gap constancy.
- Longer lifetime of rotor and bed knife.
- No material deposits in screw heads.
- The bed knife holder can be installed by your qualified technician.
- Cutting blades are interchangeable between old and new design.
